

# PROTECTIVE RIDING JEANS

## SAFETY+COMFORT

Sometimes you have those days riding when things go wrong, and it maybe because of someone else and not you - BUT when this happens, you really appreciate the quality and specs of your motorcycle gear.

This is one of the most important things to remember when preparing for a ride, be it a long or short ride. We should feel comfortable in our gear, and also comfortable that our gear improves our level of protection, in case of the unforeseen.

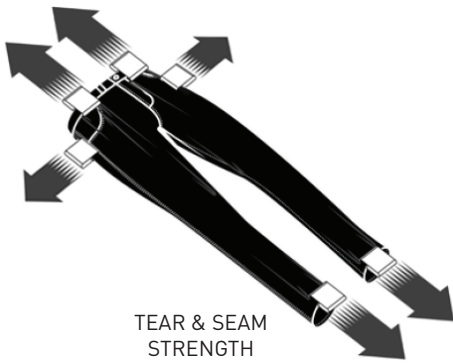

At **MOTODRY**, we always pay attention to the quality and functionality of our products, and our **ORIGINALS Jeans range is no different** - they are thoroughly tested in Australia, by our riders, and also in accordance to meeting the current European standard - EN 17092, which is a CE certification standard for protective motorcycle clothing.

## CE STANDARD

CE certified motorcycle apparel has a "Class" section within the CE label / marking - the shown label / marking identifies 4 different classes of protectiveness: AAA, AA, A, and B (being the lowest).

MOTODRY ORIGINALS jeans are fully CE tested and approved, to surpass the required standard criteria.
